

20 June 2025

To Whom It May Concern,

I am writing to endorse the SkyGuard IAM Ai system developed by AM Risk and Training. Over the past year, Lanseria International Airport has had the privilege of utilizing this innovative technology, and we have seen remarkable results.

Since the deployment of SkyGuard IAM Ai, we have experienced a real time monitoring of wildlife, significantly enhancing the safety and efficiency of our operations. The system's real-time detection and predictive analytics have allowed our team to take proactive measures, greatly reducing the risks posed by wildlife.

Furthermore, the commitment of AM Risk and Training to innovation and sustainability aligns perfectly with our goals, making SkyGuard IAM Ai an invaluable asset to our airport. We highly recommend this technology to any organization seeking to enhance their wildlife hazard management and improve overall safety.

Sincerely,

Danie Opperman
Executive Manager: Corporate Services
